

Technical Talk and Visit

- Title : **Technical Talk and Visit to Two International Finance Centre**
- Date : **30 October 2004 (Saturday)**
- Time / Duration : **9:00am - 12:00noon**
- Assembly Venue : Main entrance of Ground Floor, Two International Finance Centre
- Introduction : Two IFC is an 88-storey Grade A office building which stands at 420m off the ground and one of the tallest buildings in the world. This building is extremely challenging to the engineers not only because of the height but also the complexity of the E&M services which are designed to deliver high reliable and flexible systems to the world-wide tenant.
- Program Highlight : A technical talk will give a brief overview of the E&M systems of 2IFC. It will then be followed by a technical visit to some of the major E&M facilities including chiller plant, AHU room, main LV switchroom, generator set room, BMS control room, etc.
- Honorable Speaker : **Mr. Albert To**, has been working for over 17 years of working experience in building services engineering consulting field. He is a project manager responsible for the design and contract administration of the Hong Kong Station – Northern Site Development including 2IFC, IFC mall, basement carpark and Four Seasons Hotel.
- Fee : Free of charge
- Application : Open to ASHRAE members only. Please complete and return the below application form by [e-mail](mailto:apply@ashrae.org.hk) or by fax at 2234 7105 before **21 October 2004**. Number of participants is limited to **25**. Quota will be allocated on first-come-first-served basis. Successful applicants will be informed individually by e-mail or phone. Applicants who do not receive a reply before **25 October 2004** may assume their application unsuccessful.
